

wrapRATER™

BUNDLE. SAVE. WIN!

Wrap Rates are the indirect burdens covering Fringe Benefit, Overhead and General & Administrative costs which are applied to direct labor costs to derive the true cost of labor. Development of wrap rates is a key component of the pricing models within Richter & Company's current Analysis of Competitor Solutions and Pricing offering.

All wrapRATER™ products are developed by full-time staff with real time data (built on demand per order). Richter & Company has been developing these wrap rates since 2006 for our price to wins.
