Our Value Proposition

We collect data ethically; we do not misrepresent our services or capabilities

We turn raw data into intelligence —
news you can use – not fluff filling a report

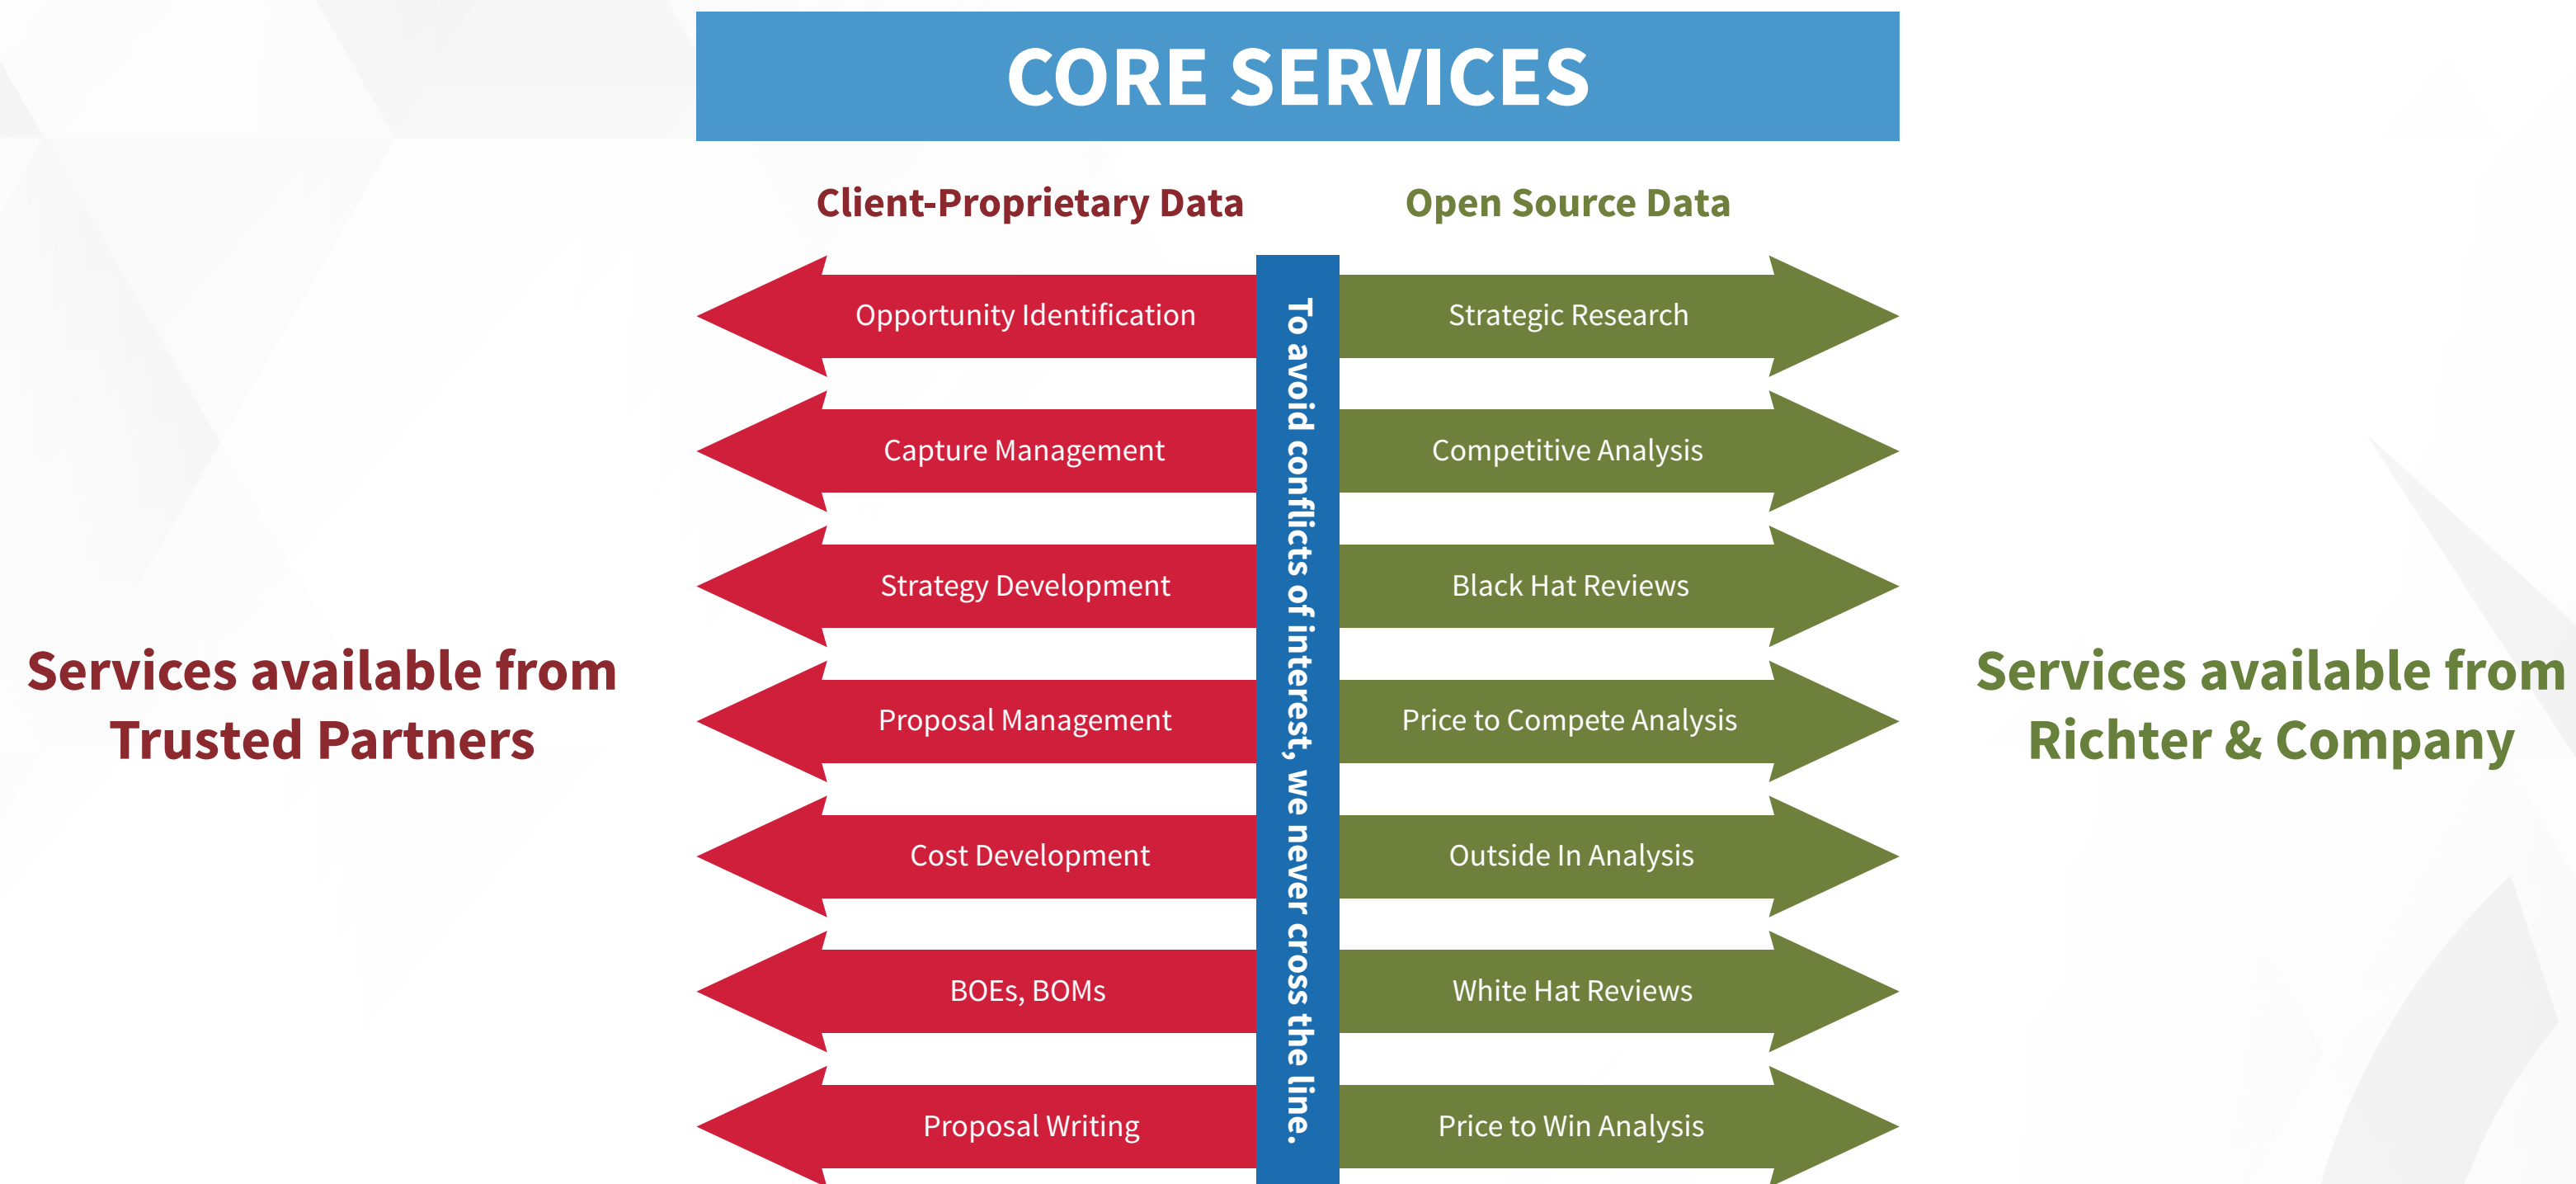

We challenge your assumptions by presenting an unbiased view of each opportunity, free from external and internal influence

We identify innovative ways to expand the “Win Zone”, moving the competition away from price alone

We help you win!

Our Value Proposition

We work with open-source data — not the client's

We refer client-facing work to partners whose results and ethics we trust

We support one client exclusively on any program

The result: **you get the help you need, without conflicts of interest**

Services Across the BD Life Cycle

Services are offered on an exclusive basis,
quoted per job as firm fixed price or T&M.

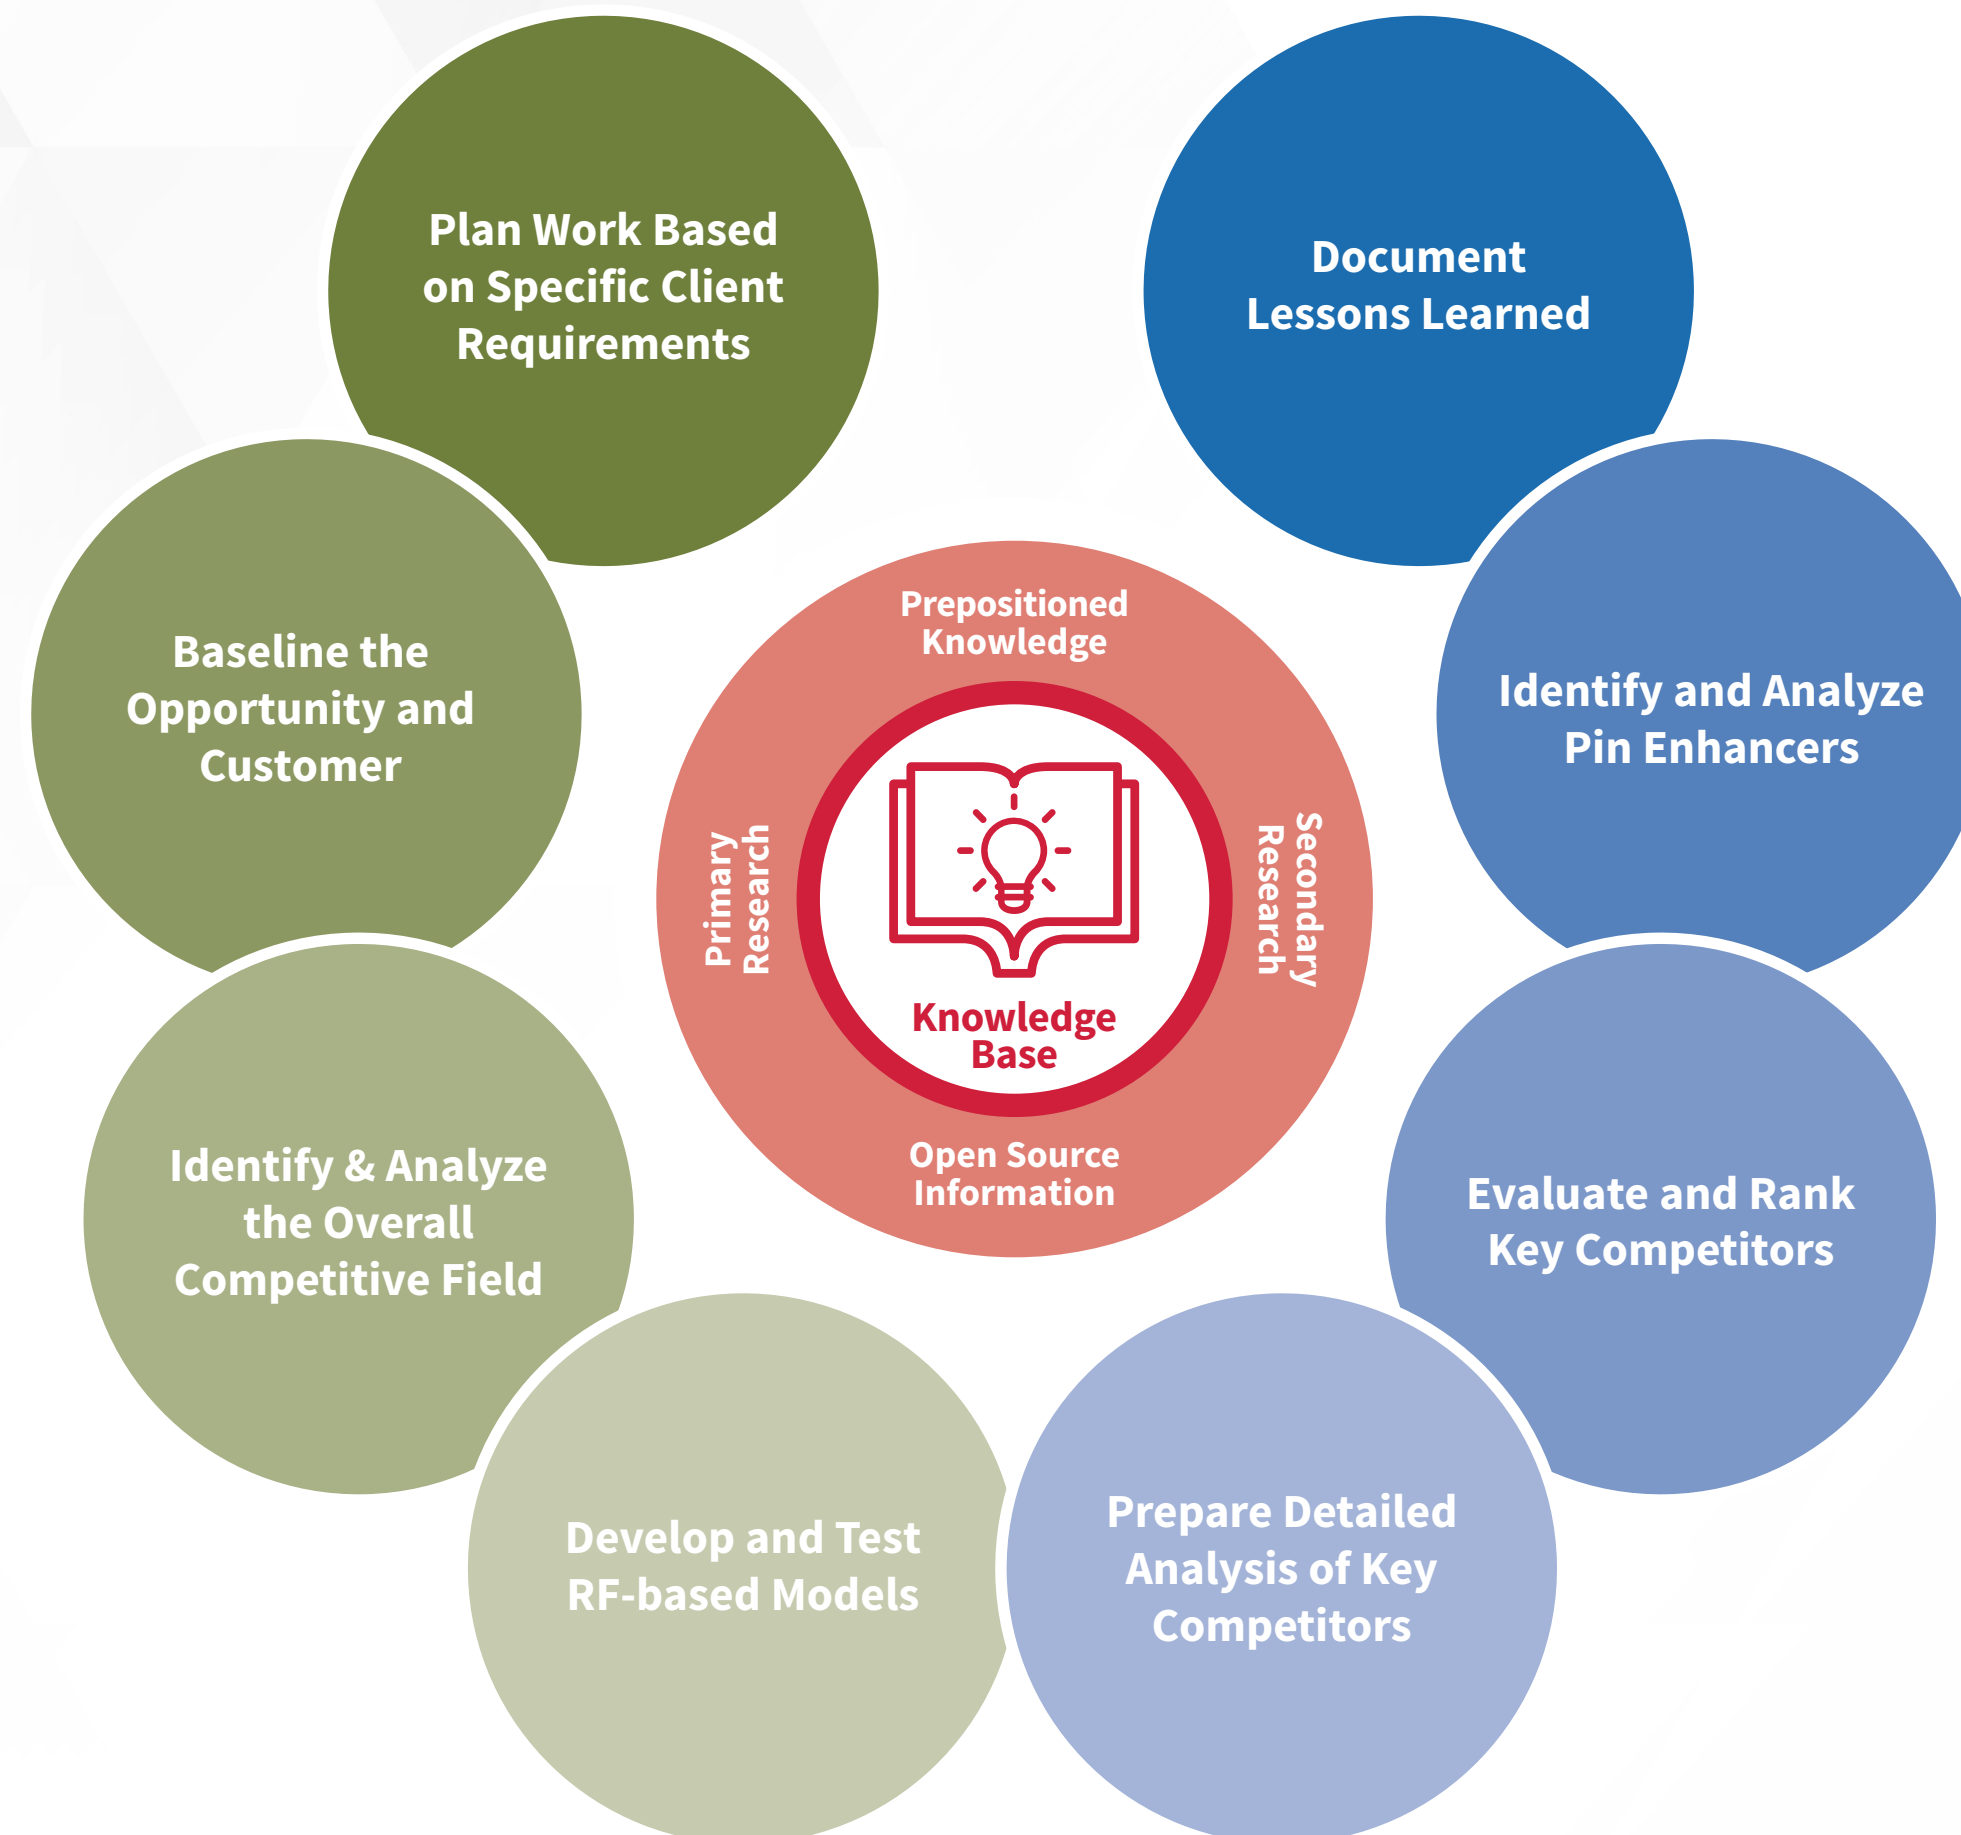

Our Goal is to **Help you win!**

All offerings provide actionable intelligence

News you can use to increase both win probability and profitability

Strategic Analyses

Our effective market research helps you safely navigate the troubled waters of today's hyper-competitive marketplace. **We help you position to win!**

Effective market research is a strategic process that ensures that your company's goals and business development efforts align. Richter & Company focuses on the key trends and drivers that show where the marketplace is heading. This enables you to position your products and services with your prospective customers, and influence the eventual RFP in your favor. Our effective market research provides several key benefits:

We help you identify new markets.

We reduce both your risk and the cost of doing business.

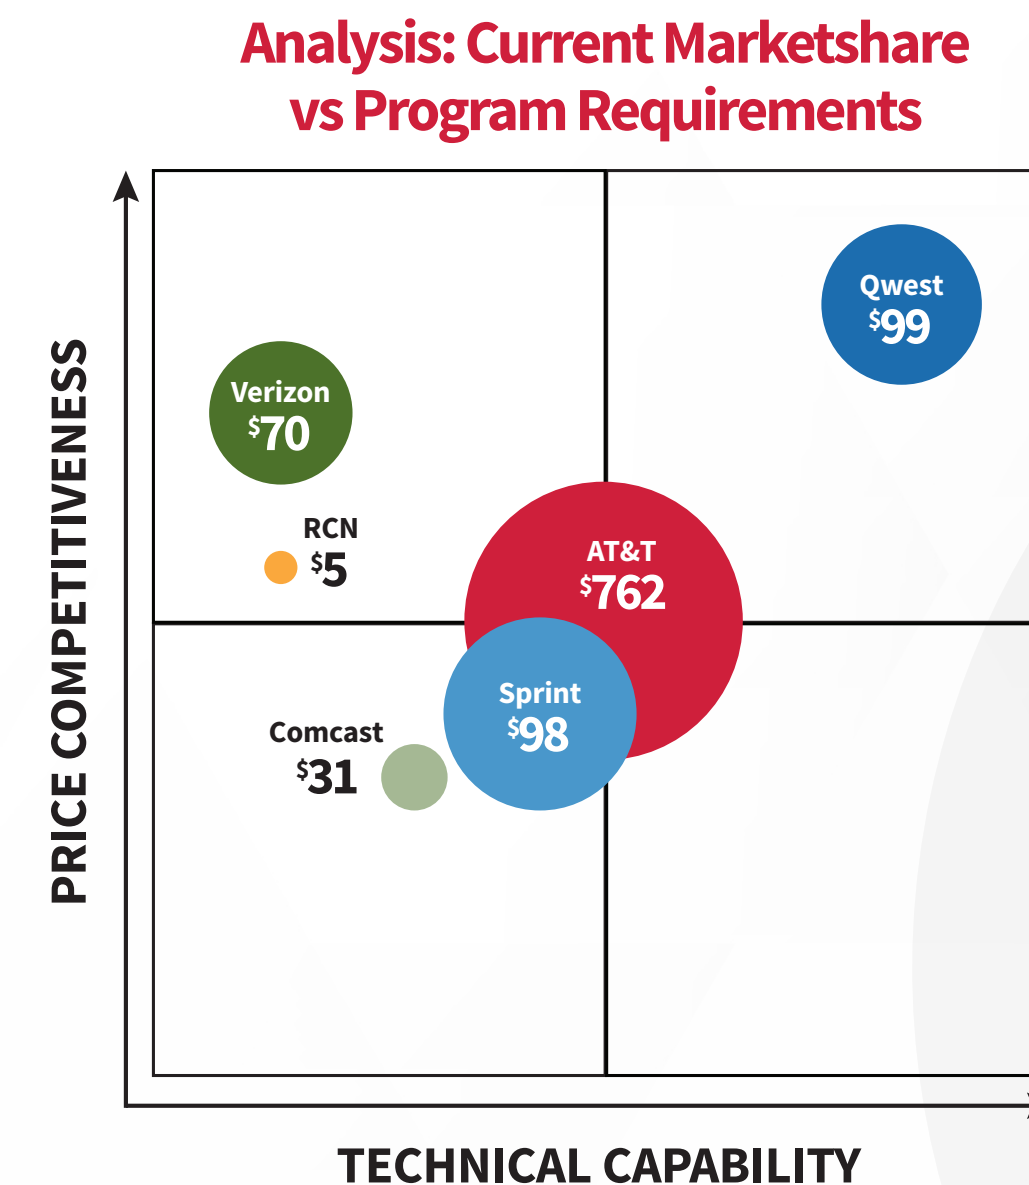

We provide you the means to benchmark performance.

Results help you develop a plan to win and perform in a market.

Our Innovative Tools Turn Raw Data into Actionable Information

The basic Value Square™ is adaptable to your needs, providing at-a-glance information to help you make informed decisions.

Consistent Models + Current Data = Accurate Analyses
